Short description:

Print at: 95% infill with 3 or 4 top layers. You should observe small gaps while infill is printing and no gaps when top layers print. Added mini version for getting the rough dial-in without printing such a large model.

Description:

If you can, please use the online documentation found at <http://www.youmagine.com/designs/extrusion-rate-calibration-steps> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
